

Three dimensions. No compromises.

.3Dee
Active Office Chair

Not simply ergonomic. But threefold dynamic.

The **3Dee** active office chair is the first of its kind and the result of absolute consistency – in engineering just as in design. Its 3D movement – horizontal and vertical – is designed without compromise around the natural biomechanical model of the human being. It thus already fulfils the vision of sustained change to our everyday office life: with more wellbeing, more energy and more balance. And its attractive design will please particularly all those for whom the office is not just a workplace, but also a creative living space.

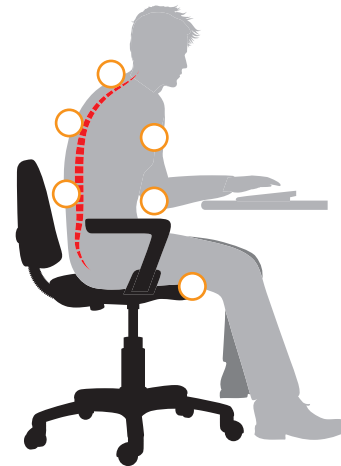

The Revolution of Ergonomics.

Conventional seats cannot do much against the daily lack of movement in the office. On the contrary: they can even contribute to muscular atrophy and bad sitting postures. We call this the “sitting trap” – because sedentary activities frequently lead to illness.

The remedy is more movement in daily office life. With its unique concept of 3D ergonomics the **3Dee** supports and encourages the intuitive movements of the human being. The principle is as simple as it is ingenious: the chair follows the movement of the body and not vice versa. The result: natural sitting, controlled movement up and down combined with posture-optimising movement sideways, backwards and forwards.

Sitting on a conventional
office chair

Sitting on the **3Dee**
Active Office Chair

The most innovative office chair in the world.

Activated: Because the **3Dee** follows the movements of its sitter, so your back keeps straight. In addition, frequent change of posture strengthens your back and keeps your muscles fit.

Motivated: The **patented 3D Technology** ①, comprising the unique 3D movable joint in the base and the spring strut, supports and encourages harmonious 3D movement. This stimulates your circulation, puts you in a good mood and boosts your performance.

Relaxed: The backrest with **patented lamellar technology** ② and **physiologically shaped backrest cushioning** ③ provides support without restricting freedom of movement. The **lumbar support** ④ and **backrest tension** can be individually adjusted.

Unrestricted: The intelligent seat is slightly convex, upholstered with breathable **multi-zone integral foam** ⑤ and equipped with the **flexzone® technology** ⑥. For a healthy seat climate and optimum sitting comfort without any pressure points.

Moving. In every detail.

There is always room for innovation where demands are high.

Time for a change.

Whoever does not want to make compromises for their health and is looking for an office swivel chair that also catches the eye, then there is no getting round the **3Dee** active office chair. It is moving, relaxing and high-tech design to the very last detail. This is unique and introduces a new form of dynamics and quality of life into the office. You can't expect more of an office chair. But it doesn't have to be less in the future either. Go for three dimensions. And no compromises.

Technical Data.

Seat width/ Seat depth:	46 cm (18.1")/ 41 – 46 cm (16.1" – 18.1")
Chair height:	110 cm (43.3") incl. backrest
Seat height:	BASIC spring model: Height adjustment range 42 – 56 cm (16.5" – 22") loaded* COMFORTPLUS spring model: Height adjustment range 45 – 59 cm (17.7" – 23.2") loaded*
Seat cover materials:	Gabriel Step/Step Melange: 100% Trevira CS, hard wearing, colour fast to light, flame retardant, certified in compliance with Oeko-Tex 100 PREMIUM-Leather: high-quality semi-aniline leather with natural grain (black)
Seat cover colours:	grey-melange, aqua, caramel, coral, black
Weight:	20 kg (44 lbs)
Load:	60 – 120 kg (132 – 265 lbs)
Backrest:	43 cm (16.9") height
Base:	75 cm (29.5") diameter
Safety gas spring:	140 mm (5.5") height interval

*Seat height measured with a standard load of 65 kg (143 lbs).

Individual: backrest tension & seat height

Adjustable: movement sideways & vertical bounce

Our success lies in movement.

If you observe children, you will see that there is hardly a moment when they keep still. Movement is in the very nature of the human being. It is the long periods of sitting and standing – in school, at work and in the car – that put the body into a straightjacket of motionlessness, which we finally pay at a very high price: our health.

Therefore, since 1997, aeris has devoted itself to revolutionising standing and sitting at the workplace. Our philosophy is as simple as it is effective: more movement! In three dimensions. We call that 3D ergonomics. For our customers this simply means better health, more motivation and higher productivity. And success proves us right. Our products – be they the **swopper** active seat, the **muvmán** active seat for standing/sitting seat or the new **3Dee** office chair – set new benchmarks and have catapulted aeris into the top 100 of the most innovative small and medium-sized German businesses.
