

Stand or Sit? Both!

The innovative **movman** active seat for standing/sitting brings movement to the workplace. It is unique in that it combines dynamic movement when standing and sitting and gives many impulses for intuitive posture change.

The **movman** not only works uncompromisingly against the drawbacks of long periods of standing, but also goes one step beyond: it encourages change of posture both when standing and sitting, it can be used practically anywhere and always enhances wellbeing, productivity and movement.

Moving. In every detail.

The **muvmán** provides for optimum standing and sitting with movement. It has continuous height adjustment **1** from 51cm to 84cm. The flexible front edge of the seat **2** prevents pressure points on the underside of the thighs. The **muvzone®** movement element **3** gives full flexibility of movement to the sides and extends your reach. The flexible tilt **4** reduces the distance to the working surface and prevents the hunchback posture. The foot **5** is stable and safe.

Furthermore, the **muvmán** is available in various versions for use in offices, laboratories, production and assembly. Interested? Just get in touch with us.
